UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WASHINGTON

RAMON TORRES HERNANDEZ, and
FAMILIAS UNIDAS POR LA JUSTICIA,
AFL-CIO, a labor organization;

Plaintiffs,

vs.

UNITED STATES DEPARTMENT OF
LABOR and EUGENE SCALIA, in his
official capacity as United States Secretary
of Labor,

Defendants.

No.

COMPLAINT FOR
DECLARATORY AND
INJUNCTIVE RELIEF

I. PRELIMINARY STATEMENT

1. For decades, the prevailing practice in Washington State's tree fruit industry has been to pay piece-rate wages to farmworkers who harvest our state's cherry, pear, and apple crops. Piece-rate wages benefit agricultural employers

1 because they reward farmworkers who work quickly with wages well above
2 minimum wage, and thus, ensure that highly perishable crops are harvested on-
3 time to maximize grower profits.

4 2. By picking as many lugs or bins of fruit in a day as their bodies will
5 tolerate, the average farmworker earns \$18 an hour on piece rate harvest wages
6 while highly skilled farmworkers can earn wages well in excess of \$20 per hour.
7 Impoverished farmworker families rely on peak piece-rate harvest wages to pay
8 rent and buy food when seasonal work disappears during the winter and early
9 spring.
10

11 3. For decades, Washington's piece-rate wage system has operated in a
12 labor market in which growers had to set piece-rates based on principles of supply
13 and demand. Farmworkers either accepted the offered wages and began work or
14 negotiated for increased wages. If an agreement could not be reached, farmworkers
15 had the freedom to pursue a better deal at the next orchard down the road.
16

17 4. The recent rise in the tree-fruit industry's use of the federal H-2A
18 program to recruit thousands of foreign workers and their efforts to influence state
19 wage surveys, now threaten to undermine the decades-old prevailing practice of
20 paying higher piece-rate wages unless governmental agencies fulfill their statutory
21 mandate to protect the wages and working conditions of U.S. farmworkers.
22
23

1 5. Agricultural employers using the H-2A system realize they do not
2 need piece-rate wages to incentivize foreign H-2A workers to accept their jobs or
3 to meet production demands because those vulnerable workers are tied to single
4 employer through their work visas and they have no ability to seek better wages or
5 working conditions at a neighboring orchard. Accordingly, H-2A employers can
6 attempt to reduce their labor costs by pegging harvest wages to lower hourly
7 minimum wages. This violates the statutory mandate of the H-2A program which
8 prohibits practices that adversely affect the wages and working conditions of U.S.
9 farmworkers.
10

11 6. This case challenges USDOL's role in arbitrarily interjecting the
12 "hourly wage guarantee" concept into Washington's prevailing wage surveys,
13 which mirrors changes advocated by the agricultural industry, resulting in the
14 elimination of higher piece-rate wages for the 2021 cherry, pear and apple
15 harvests, replacing them with the drastically lower minimum wage.¹
16

17 7. Ramon Torres Hernandez and Familias Unidas por la Justicia, AFL-
18 CIO (FUJ) seek immediate declaratory and injunctive relief to prevent this
19 arbitrary agency action from drastically slashing the wages of Washington
20

21 ¹ Washington's current minimum wage is \$13.50 and will increase to \$13.69
22 on January 1, 2021.
23

1 farmworkers and to preserve the status quo until a prevailing wage survey that
2 complies with federal law can be completed.

3 **II. JURISDICTION AND VENUE**

4 8. This Court has jurisdiction over this action pursuant to
5 28 U.S.C. § 1331 (federal question) and §2201(a) (declaratory relief). Jurisdiction
6 is also proper under the judicial review provision of the Administrative Procedure
7 Act, 5 U.S.C. § 702.
8

9 9. Declaratory and injunctive relief is sought consistent with
10 5 U.S.C. §§ 705 and 706 and as authorized in 28 U.S.C. §§ 2201 and 2202.
11

12 10. The proper venue for this action is in the Eastern District of
13 Washington pursuant to 28 U.S.C. § 1391(e)(1) because Defendants are an agency
14 of the United States and an officer acting in his official capacity, no real property is
15 involved in this action, and Plaintiff Ramon Torres Hernandez resides in the
16 District.
17

18 **III. PARTIES**

19 11. Plaintiff Ramon Torres Hernandez (“Plaintiff Torres”) resides in
20 Yakima County, Washington. Plaintiff Torres is a U.S. worker within the meaning
21 of 20 C.F.R. § 655.103(b) who harvested cherries, pears, and apples in 2020, and
22 intends to seek agricultural employment, including harvesting tree fruit in the
23

1 Yakima Valley in 2021 and beyond. Plaintiff Torres is a member of Familias
2 Unidas por la Justicia.

3 12. Plaintiff Familias Unidas por la Justicia (FUJ) is a farmworker labor
4 union with approximately 900 members statewide and is affiliated with the
5 Washington State Labor Council, AFL-CIO. FUJ's members, many of whom have
6 families with small children, earn annual wages that put them at or below federal
7 poverty guidelines. USDOL's failure to set prevailing wages as required by federal
8 law will result in substantial decreases to FUJ members' already meager wages.
9 FUJ brings this action on behalf of its members and farmworkers who rely on
10 higher piece-rate wages to support themselves and their families.
11

12 13. Defendant Eugene Scalia is the Secretary of Labor and charged with
13 the supervision and management of all decisions and actions within the United
14 States Department of Labor (USDOL). Plaintiffs sue Secretary Scalia in his official
15 capacity.
16

17 14. Defendant USDOL is an agency of the United States within the
18 meaning of the APA. It is responsible for overseeing and approving annual wage
19 and working conditions surveys under the H-2A program to primarily protect the
20 working conditions of domestic farmworkers and only issuing labor certifications
21 to import foreign workers if sufficient domestic workers are not available to fill the
22 jobs, as set forth in the Immigration and Nationality Act (INA), 8 U.S.C. § 1188.
23

IV. STATUTORY AND REGULATORY BACKGROUND

15. The H-2A program allows U.S. employers to bring foreign nationals to the United States to fill temporary agricultural jobs where the supply of U.S. workers is insufficient, if and only if, the importation of such workers does not depress the wages and working conditions of domestic farmworkers.

16. The modern-day H-2A program traces back to 1952, when Congress passed the Immigration and Nationality Act. The 1952 program authorized the use of temporary foreign labor but did not distinguish between agricultural and non-agricultural workers. The “H-2” program was available to employers for agriculture and non-agriculture jobs until 1986, when the Immigration Reform and Control Act of 1986 (IRCA), P.L. 99-603, § 301, 100 Stat. 3359 (1986), amended the INA by establishing a separate H-2A visa classification for agricultural workers and H-2B for non-agricultural temporary foreign workers.

17. The 1986 revisions to the foreign guestworker program were motivated by Congress’s desire to ameliorate the various problems experienced under the Bracero program, the most significant of which was the “inadequacy of ... protections for farmworkers.” H.R. Rep. 99-682, at 80 (1986); *see Labor Certification Process for the Temporary Employment of Aliens in Agriculture and Logging in the United States*, 52 Fed. Reg. 20,496 (June 1, 1987). The protections afforded to U.S. and foreign guest workers under the H-2A program are thus

1 informed by, and should be considered in the context of, the problems with the
2 Bracero program.

3 18. The Bracero program was intended to increase the number of
4 available farmworkers in the United States during the World War II worker
5 shortage by authorizing the entry of Mexican nationals for temporary farm work.
6 The program existed from 1942 to 1964. *See* Adam B. Cox & Cristina M.
7 Rodriguez, *The President and Immigration Law*, 119 Yale L.J. 458, 487-90 (Dec.
8 2009).

9 19. While the Bracero program was in effect, it “was the chief source of
10 foreign labor in the United States.” Robert C. McElroy & Earle E. Garrett, USDA
11 Econ. Research Serv., *Termination of the Bracero Program: Some Effects on Farm*
12 *Labor and Migrant Housing Needs*, Agric. Econ. Report No. 77 (June 17, 1965).
13 Although the United States benefitted from this cheap source of labor, Congress
14 acknowledged that “[t]he Bracero program has been likened by some to indentured
15 slavery where employer exploitation was rampant and inhumane.” H.R. Rep. 99-
16 682, at 83. Some of the major problems under the Bracero program included
17 underpayment, dangerous working conditions, unhealthy living conditions, and
18 threats of deportation by employers.

19 20. Beyond the substandard working and living conditions experienced by
20 Mexican Bracero workers, the program also caused the wages paid to U.S. workers
21

1 in the agriculture and railroad sectors to decline sharply, despite the inclusion in
2 the Bracero program of mechanisms designed to prevent adverse wage effects on
3 U.S. workers. *See, e.g.,* Cong. Research Serv., *The Effects on U.S. Farm Workers*
4 *of an Agricultural Guest Worker Program* 4-5 (Dec. 28, 2009),
5 <https://www.everycrsreport.com/reports/95-712.html>.
6

7 21. Outrage over the inhumane treatment of Bracero workers and the
8 program's downward pressure on wages led Congress to end the program in 1964.
9 When enacting the modern H-2A program, Congress was well aware of the past
10 problems in the Bracero program. *See* H.R. Rep. 99-682, at 83.
11

12 22. As a result of Congress's attempt to avoid replicating the problems in
13 the H-2A program, in order for employers to secure the benefits of foreign labor
14 under the current H-2A program, they must complete a multi-step process.

15 23. Prior to filing a petition with U.S. Citizenship and Immigration
16 Services (USCIS), a division of the Department of Homeland Security, the
17 employer must obtain a temporary labor certification from USDOL's Office of
18 Foreign Labor Certification (OFLC) that "there are not sufficient workers who are
19 able, willing, and qualified, and who will be available at the time and place needed,
20 to perform the labor or services involved in the petition," and that "**the**
21 **employment of [foreign] labor . . . will not adversely affect the wages and**
22
23

1 **working conditions of workers in the United States similarly employed.”**

2 8 U.S.C. § 1188(a)(1) (emphasis added).

3 24. Employer use of the H-2A program has risen in recent years. In
4 Fiscal Year 2020, USDOL certified 275,430 positions to be potentially filled by
5 H-2A workers. Declaration of Arasele Bueno (Bueno Decl.), Ex. 22. The vast
6 majority of these certifications were for crop workers (88.1% of the certifications),
7 agricultural equipment operators (5.6%), or ranch or aquaculture workers (4.0%).
8 *Id.* In Fiscal Year 2020, USDOL certified 26,832 positions in Washington State,
9 making it the third highest user of H-2A workers in the nation. *Id.*

10
11 25. The USDOL has promulgated regulations that govern the H-2A labor
12 certification process. 20 C.F.R. Ch. V, Pt. 655, Subpt. B. These regulations contain
13 numerous specific requirements for employers seeking to hire workers through the
14 H-2A program.

15
16 26. To fulfill its duty to prevent an adverse effect on the wages of
17 domestic farmworkers, USDOL regulations require that employers pay a wage that
18 is the highest of the AEWR,² the prevailing hourly wage or piece rate, the agreed-
19

20
21 ² The Adverse Effect Wage Rate (AEWR) is defined as:

22 the minimum wage rate that the Administrator of the Office of
23 Foreign Labor Certification (OFLC) has determined must be offered
and paid to every H-2A worker employed under the DOL-approved
Application for Temporary Employment Certification in a particular

1 upon collective bargaining wage, or the Federal or State minimum wage.

2 20 C.F.R. § 655.120(a); *see also* 20 C.F.R. § 655.122(l).

3 27. Additional regulations promulgated under the Wagner-Peyser Act,³
4 29 U.S.C. § 49 *et seq.*, require the State Workforce Agency (SWA) to ensure for
5

6 occupation and/or area, as well as to U.S. workers hired by employers
7 into corresponding employment during the H-2A recruitment period,
8 to ensure that the wages of similarly employed U.S. workers will not
be adversely affected.

9 29 C.F.R. § 502.10. The AEWR is often referred to as the minimum hourly wage
10 for the H-2A program.

11 ³ The Wagner-Peyser Act, passed by Congress during the Great Depression,
12 created a public employment system aimed at improving the employment
13 prospects and lives of farmworkers in the United States. *See Alfred L. Snapp &*
14 *Son, Inc. v. Puerto Rico, ex rel., Barez*, 458 U.S. 592, 594-96 (1982). The system
15 was intended to protect against wage depression for local farmworkers through the
16 recruitment of more desperate workers willing to accept lower wages. *See id.* The
17 current regulatory structure is the result of litigation challenging the abject failure
18 of state job service agencies to protect the wages and working conditions of
19 domestic farmworkers. *See NAACP, W. Region v. Brennan*, 360 F. Supp. 1006,
20 1014 (D.D.C. 1973) (commonly referred to as the Judge Richey decision); 45 Fed.
21 Reg. 39454 (Jun. 10, 1980).
22
23

1 all agricultural job orders, H-2A and non-H-2A, that “wages . . . offered are not
2 less than the prevailing wages . . . among similarly employed farmworkers in the
3 area of intended employment or the applicable Federal or State minimum wage,
4 whichever is higher.” 20 C.F.R. § 501(c)(2)(i).

5
6 28. The SWA in Washington State is the Employment Security
7 Department (ESD).

8 29. ESD, as the SWA, is required to conduct prevailing wage surveys
9 using the standards set forth by USDOL in Handbook 385. *See* 84 Fed. Reg.
10 36168, 36184 (Jul. 26, 2019). The Handbook pre-dates the creation of the H-2A
11 program and has not been updated since 1981. *Id.* The prevailing wage is intended
12 to provide an additional safeguard against wage depression in local areas through
13 the importation of outside labor. 85 Fed. Reg. 70445, 70450 (Nov. 5, 2020).

14
15 30. The first sentence in Handbook 385 states the purpose of prevailing
16 wage surveys: “Accurate farm wage data are essential to the effective operation of
17 the Public Employment Service in serving farm employers and farm workers and
18 in implementing the Secretary’s regulations on the intra/interstate recruitment of
19 farmworkers. (20 C.F.R. § 653.501)”. Bueno Decl., Ex. 2 at 102 [I-111].
20
21
22
23

V. STATEMENT OF FACTS

A. Prevailing Piece-Rates Exceeding Statutory Minimums Are Well Established in Washington State

31. From 2006-2018, the wage survey process in Washington State determined, consistent with the agricultural industry's decades-old practice, that piece-rate wages were the prevailing wages for the harvest of apples, cherries and pears. *See* U.S. Dep't of Labor, Agricultural Online Wage Library, <https://www.foreignlaborcert.doleta.gov/reader-archive.cfm?abbr=WA>.

32. Those findings were also consistent with what the agricultural industry touted as a wage system that benefitted both growers and farmworkers.

33. In January 2015, when the issue of whether farmworkers being paid the piece rate were entitled to paid rest breaks was before the Washington Supreme Court, three agricultural industry entities, including the Washington Farm Labor Association ("WAFLA"),⁴ filed an amicus brief asserting that piece rates are the common method of payment for hand harvesting crops. *Bueno Decl.*, Ex. 3 at 152.

⁴ At this time, WAFLA asserted it was an association comprising hundreds of agricultural employers in Washington State and that its members included companies that employ hundreds to thousands of workers on a piece rate basis. It further asserted that it filed approximately 80 percent of the H-2A applications in

1 34. More specifically, the agricultural industry asserted that “Washington
2 is number one in the harvest of: apples, sweet cherries and pears, all of which are
3 traditionally handpicked at piece rate wages.” *Id.* at 154.

4 35. Moreover, the agricultural industry argued that skilled piece-rate
5 workers often make more than \$20 an hour under this system. *Id.*

6 36. The agricultural industry further argued that both farmers and
7 farmworkers benefit under a piece-rate system of pay. *Id.* at 152-53.

8 37. The agricultural industry argued that with the advent of the
9 Washington minimum wage, piece rate compensation was tethered to an “hourly
10 minimum wage guarantee.” *Id.* at 152

11 38. The Washington State minimum wage and the AEWR, for growers
12 using the H-2A program, were the *only* hourly wage guarantees referenced as
13 being used in connection with the piece-rate system. *See id.* at 152-56.

14 39. In July 2015, the Washington Supreme Court held that farmworkers
15 being paid the piece rate were entitled to be paid for rest periods at their regular
16 rate of pay or the minimum wage, whichever was greater. *Lopez Demetrio v.*
17 *Sakuma Bros. Farms, Inc.*, 183 Wn.2d 649, 663, 355 P.3d 258, 266 (2015).

18
19
20
21
22 Washington and was the second largest employer of H-2A foreign workers in the
23 nation.

1 40. In response to that decision, tree fruit growers sought relief from
2 liability for back wages owed for failure to pay farmworkers for their rest breaks
3 from the Washington State Legislature.

4 41. During a legislative hearing on the bill in February 2017, the
5 agricultural industry presented a video in support of the piece-rate system
6 including worker testimony that the piece-rate system gives them a chance to make
7 more money, estimating workers earn \$250 to \$300 per day during the cherry
8 harvest.⁵

9
10 42. During that same hearing West Mathison testified as the President of
11 Stemilt Growers, the largest grower of apples and pears in the United States, and
12 on behalf of the industry and 80 other growers who bring their fruit to Stemilt's
13 fruit packing warehouses. Mr. Mathison testified that the average piece-rate pay
14 was approximately \$18.00 per hour.⁶

15
16
17
18
19
20 ⁵ Testimony available at: [https://www.tvw.org/watch/?clientID=9375922947](https://www.tvw.org/watch/?clientID=9375922947&eventID=2017021224&eventID=2017021224&startStreamAt=2068&stopStreamAt=2293&autoStartStream=true)
21 [https://www.tvw.org/watch/?clientID=9375922947](https://www.tvw.org/watch/?clientID=9375922947&eventID=2017021224&eventID=2017021224&startStreamAt=2068&stopStreamAt=2293&autoStartStream=true)
22 [https://www.tvw.org/watch/?clientID=9375922947](https://www.tvw.org/watch/?clientID=9375922947&eventID=2017021224&eventID=2017021224&startStreamAt=2068&stopStreamAt=2293&autoStartStream=true)
23 [https://www.tvw.org/watch/?clientID=9375922947](https://www.tvw.org/watch/?clientID=9375922947&eventID=2017021224&eventID=2017021224&startStreamAt=2068&stopStreamAt=2293&autoStartStream=true) (starting at approximately 34:00).

⁶ *Id.* (starting at approximately 100:52).

1 43. Mr. Mathison further testified that piece-rate wages allow Stemilt to
2 “fairly compensate [farmworkers] at rates higher than minimum wage and with
3 better productivity to the company.”

4 44. Wage data obtained from Stemilt affirms the agricultural industry’s
5 representations to the Washington Supreme Court: domestic piece-rate workers
6 earned on average \$20.00 per hour picking cherries in 2016 and \$24.10 per hour in
7 2017. Bueno Decl., Ex. 3 at 143-44 ¶ 5; *see also* Declaration of Rachael
8 Pashkowski (Pashkowski Decl.) ¶ 14 (calculating average earnings for domestic
9 and foreign H-2A workers).

10 45. An East Wenatchee grower recently reported that his 2019 cherry
11 pickers averaged \$35 per hour when their piece rate is converted to an hourly rate.
12 Bueno Decl., Ex. 7.

13 46. Plaintiff Torres can make more than \$30 per hour when picking
14 cherries by the piece rate, harvesting five bins in about eight hours, depending on
15 conditions and the piece-rate, consistent with worker testimony in the legislative
16 process. Declaration of Ramon Torres Hernandez (Torres Decl.) ¶ 8.

17 47. An organizer with the United Farm Workers (UFW) who submitted a
18 declaration in connection with ESD’s 2019 Wage Survey Results declared that
19 farmworkers when being paid by the piece rate for harvesting cherries commonly
20 earn over \$20.00 an hour. Bueno Decl., Ex. 3 at 142.

1 **B. Washington Agricultural Industry Efforts to Replace Higher**
2 **Paying Piece Rates with the Minimum Wage**

3 48. In the fall of 2015 following the Washington Supreme Court's
4 landmark decision in *Lopez Demetrio* in July, the piece-rate rest-break case, the
5 agricultural industry, led by the director of WAFLA, Dan Fazio, engaged in a
6 concerted campaign to eliminate prevailing piece-rate wage findings in connection
7 with Washington's Agricultural Wage survey.

8 49. Mr. Fazio implored growers to report on their wage survey forms that
9 they had paid Washington State minimum wage or the AEWL for the harvesting of
10 tree fruit, rather than reporting the piece rates actually paid. Mr. Fazio justified this
11 false reporting on the basis that these hourly minimum wages were "guaranteed
12 hourly" rates. *See* Bueno Decl., Ex. 3 at 133, 136 & 137.

13 50. The WAFLA campaign orchestrated by Mr. Fazio directly
14 contradicted the amicus brief filed by WAFLA and other agricultural industry
15 groups just months earlier with the Washington Supreme Court. *Supra* ¶¶ 33-38;
16 *Cf.* Bueno Decl., Ex. 3 at 134 & 153-54.

17 51. After an investigation, ESD concluded that the wage survey data was
18 tainted, with apple, pear and cherry growers improperly influenced by the WAFLA
19 campaign. Bueno Decl., at Ex. 8 & Ex. 9 at 262-63 & 10. Had ESD not removed
20 21
22
23

1 the tainted data many harvest activities would have been reduced to the
2 Washington State minimum wage rather than higher prevailing piece-rate wages.

3 52. Following the agricultural industry interference with the 2015 wage
4 survey, for the first time, the 2016 wage survey in Washington included the
5 “guaranteed hourly wage” concept. *See* Bueno Decl., Ex. 3 at 133. On information
6 and belief, ESD added the question about hourly guarantees to the wage survey in
7 response to Mr. Fazio’s advocacy and USDOL’s approval. *See id.*

8 53. USDOL ignored the fact that the “hourly guarantee” concept was
9 meaningless given that the Washington State minimum wage and the AEWR are
10 statutorily mandated and therefore apply to all employers, whether employers
11 report them or not. *See id.* at 134 (explaining the hourly guarantee concept as an
12 anachronism from a time when many farmworkers were not covered by minimum
13 wage laws, but Puerto Rican workers had enhanced wage protections under Public
14 Law 87); *infra* ¶ 82.

15 54. For the first time, the wage survey results included piece rate wages
16 for cherry, apple and pear harvest that also included an hourly guarantee. *See* U.S.
17 Dep’t of Labor, Agricultural Online Wage Library, [https://www.foreignlaborcert.](https://www.foreignlaborcert.doleta.gov/reader-archive.cfm?abbr=WA)
18 [doleta.gov/reader-archive.cfm?abbr=WA](https://www.foreignlaborcert.doleta.gov/reader-archive.cfm?abbr=WA) (May 25, 2017 findings).

19 55. Virtually all hourly guarantees reported for fruit harvest activities
20 were pegged to either the 2016 Washington Minimum Wage of \$9.47 per hour or
21
22
23

1 the 2016 AEW of \$12.69. *See id*; Pashkowski Decl. ¶ 11 (historical AEW
2 rates).

3 56. Wages for farmworkers were not impacted during the 2017 harvests
4 because both piece rates and guaranteed hourly rates were included and
5 agricultural employers were required to offer the higher piece rate wages.
6

7 57. In 2018, after ESD released initial results from the 2017 wage survey,
8 finding, as usual, that higher piece-rate pay was the prevailing practice in apple
9 harvest, the industry objected, and ESD reversed its initial findings. *See* Bueno
10 Decl., Ex. 10 at 270.

11 58. After learning of ESD's reversal, Dan Fazio, in a newsletter to all
12 WAFLA members, crowed about the role industry lobbyists played in eliminating
13 higher piece rate wages for farmworkers stating, "[I]n case you didn't hear . . .
14 [ESD] removed all piece rates for apples for growers that utilize the H-2A program
15 effective June 19[, 2018]. This is a huge win and saved the apple industry
16 millions. Really glad we could help." *Id.*, Ex. 12 at 278.
17

18 59. Realizing its mistake, ESD reversed course yet again, and attempted
19 to restore higher prevailing piece-rate wages for the 2018 apple harvest advocating
20 to USDOL that the failure to approve the piece rates would **"lead to a large
21 decrease in the required wage for workers in the Washington apple harvest"**
22 and be **"in direct conflict with the fundamental goal of the H-2A temporary
23**

1 **agricultural program to ensure domestic workers are not adversely effected**
2 **by the use of foreign labor.”** *Id.*, Ex. 11 at 273 (emphasis added).

3 60. Ultimately, USDOL refused to publish any apple harvest wage data
4 from 2017. This decision prevented the wholesale elimination of piece rate wages
5 for farmworkers in the 2018 apple harvest but resulted in the use of 2016 piece rate
6 determinations for apple harvest which deprived workers of any increase in wages
7 from 2017. *Id.*, Ex. 10 at 271.

9 **C. The 2019 Wage Survey Eliminates Many Prevailing Piece-Rates**
10 **for Harvest Activities Replacing them with the Minimum Wage**

11 60. The 2019 Washington prevailing wage survey continued the use of the
12 “hourly wage guarantee” concept, which has resulted in the total elimination of
13 higher paying piece-rates for almost all cherry, pear and apple harvest activities
14 and replaced them with the Washington State minimum wage. *See id.*, Ex. 13 at
15 287-88.

16 61. USDOL interjected the “hourly wage guarantee” concept into the
17 prevailing wage finding methodology, even though it is not defined or required by
18 the regulations or other written guidance and contravenes the statutory mandate to
19 protect U.S. farmworkers wages from adverse effects. *See infra* ¶¶ 76-81 & 91-96.

20 62. By treating piece-rates with an “hourly wage guarantee” as different
21 rates of payment from piece-rates without a guarantee, many piece-rate wages were
22
23

1 totally excluded from consideration, even though the data shows the vast majority
2 of growers reporting a wage guarantee identified a “wage guarantee” rate that was
3 the equivalent to or lower than statutorily required minimums. There is no basis to
4 distinguish a piece rate without an hourly guarantee, that is subject to statutorily
5 required minimums, from a piece rate with an hourly wage guarantee at or below
6 those same minimum-wage standards.⁷

8 63. Farmworker advocates raised grave concerns with the prevailing wage
9 findings with both ESD and USDOL resulting in a delay in USDOL publishing the
10 results. *See* Bueno Decl., Exs. 3, 4, 5 & 6. That delay will not cure the irreparable
11 harm to Washington’s farmworkers who will be deprived of any wage increase for
12 2021 and discouraged from seeking jobs at farms that employ H-2A workers, as
13 described below.

17 ⁷ Farmworkers and their advocates have also called into question whether
18 wage guarantees, other than statutorily required minimums, are actually used in
19 Washington State; they certainly are not a common or regular practice. *See* Bueno
20 Decl., Ex. 3 at 132 n.2 & 133; Torres Decl. ¶ 7; FUJ Decl. ¶ 14; *see also supra*
21 ¶ 38 (the *only* hourly wage guarantees identified by the agricultural industry in
22 2015 were statutorily required minimums).

1. 2019 Survey Results Undermine Piece-Rate Wages

64. In June 2020, ESD released the results from the 2019 wage survey (“2019 Wage Survey Results”). *See* Bueno Decl., Ex. 13.

65. Despite having found that higher piece rates, not fixed hourly wages, were the prevailing wage in Washington’s cherry harvest in all prior wage surveys since 2006, the flawed 2019 wage survey results indicated that nearly all cherry harvesting activity for specific varieties changed from a piece rate wage structure to an hourly wage rate of \$12.00 per hour.⁸ *Id.* at 3-4 & 8-9.

66. Based on the flawed 2019 results, the prevailing wage rate for the harvest of Dark Red, Lapin, Skeena and Yellow cherries were all drastically lowered from a piece rate wage where workers could earn over \$20 an hour, to an hourly wage rate of \$12.00 per hour. *Id.*

67. These results stand in dramatic contrast to the decades-old practice of paying the piece-rate for harvesting cherries through which farmworkers earn well in excess of the minimum wage. *See supra* ¶¶ 33-35 & ¶¶ 41-47.

68. In addition, the flawed 2019 prevailing wage data for two varieties of apples, Braeburn and Gala, and for the harvesting of Bosc pears were also similarly

⁸ The Washington State minimum wage in 2019 was \$12.00 per hour.

1 lowered from a piece rate wage structure to an hourly wage rate of \$12.00 per
2 hour. Bueno Decl., Ex. 13 at 287-88.

3 69. On July 14, 2020, ESD submitted the flawed 2019 wage survey data
4 to USDOL. *Id.*, Ex. 6 at 248.

5 70. In addition, one commodity-activity saw a decrease in the piece rate
6 itself; blueberry harvesting was reduced from \$.75 per pound from \$.50 per pound.
7 *Id.*, Ex. 13 at 283 & 287.⁹

8 71. The Form ETA-232 and the Handbook 385 require SWAs to explain
9 increases or decreases in prevailing rates from the previous year. *See* Pashkowski
10 Decl., Ex. 9 at 156; Bueno Decl., Ex. 2 at 128 (I-143); *see also* *Zirkle Fruit Co.*,
11 442 F. Supp. 3d at 1378-79 (analyzing whether the failure to explain an increase or
12
13

14
15 ⁹ In *Zirkle Fruit Co. v. United States Dep't of Labor*, 442 F. Supp. 3d 1366,
16 1383 (E.D. Wash. 2020), this Court upheld the \$0.75 piece rate from the 2018
17 wage survey and ordered Zirkle to remit the wages that had been withheld from
18 farmworkers.

19 Notably, Zirkle—purportedly the state's largest blueberry grower—
20 declined to participate in the voluntary survey, foregoing the
21 opportunity to dramatically increase the dataset on which ESD's
22 findings were made and—if Zirkle in fact pays less than \$0.75/lb. to
domestic laborers—potentially reduce the PWR.

23 *Id.* n.10.

1 decrease was arbitrary and capricious, and finding no such violation where the
2 change was from an hourly rate to piece rate, and not a change from one piece rate
3 to another).

4 72. The Form ETA-232 submitted for blueberry harvest wages fails to
5 include any explanation of the decrease in blueberry harvest wages from \$0.75 per
6 pound to \$0.50 per pound. Pashkowski Decl., Ex. 9 at 151-166.¹⁰

7
8 73. In addition, the data shows that at least three grower respondents who
9 participate in the H-2A program (reflected by reporting an hourly guarantee the
10 equivalent of the AEW in 2019 of \$15.03) reported a piece rate below \$0.75 per
11 pound, which was the required prevailing wage that year, as upheld in the *Zirkle*
12 *Fruit* case, including rates of \$0.50 and \$0.60 per pound. *Id.* at 149. The prevailing
13 wage ultimately identified by ESD for the blueberry harvest was the rate reported
14 by an employer who reported paying piece-rate wages *less than* the rate required
15 by law. *See id.* (line highlighted in green).
16
17
18

19 ¹⁰ Every Form ETA-232 submitted for the 2019 Washington prevailing wage
20 survey has a cover page referring to Braeburn apple harvesting. This appears to be
21 an error as the attached pages reference distinct activities, like the pages referenced
22 here pertaining to blueberries. Pashkowski Decl., Ex. 17.
23

1 74. The 2019 survey, which led to the dramatic drop in harvest wages,
2 yielded contrasting results for *non-harvest* wages, which have historically been
3 paid at an hourly rate. For every non-harvest activity for which there is a
4 comparator in the 2018 Agricultural Wage Survey, wages *increased* except for one
5 that stayed the same (pear thinning). *Compare id.* at 8-9 with Ex. 14 at 6-7.

6
7 75. Moreover, *every* non-harvesting commodity-activity with an hourly
8 rate, again except for thinning pears, has an hourly rate that *exceeds* \$12.00 per
9 hour, while *every* harvesting activity that changed from a piece rate to an hourly
10 rate is set at the minimum wage of \$12.00 per hour despite the well-established
11 understanding that wages for harvesting activities exceed other activities like
12 pruning and thinning. Bueno Decl., Ex. 13 at 287-88; FUJ Decl. ¶ 15; *see supra*
13 ¶¶ 27-38.
14

15 **2. The Arbitrary Use of the Hourly Wage Guarantee Results**
16 **in the Elimination of Higher Piece-Rate Pay**

17 76. The regulations applicable to the use of the H-2A program and the
18 Wagner-Peyser regulations do not include or define the terms “hourly wage
19 guarantee” or “earnings guarantee.”

20 77. The ETA Handbook No. 385 does not define the terms “hourly wage
21 guarantee” or “earnings guarantee.” *See* Bueno Decl., Ex. 2 at 105 (I-113).
22
23

1 78. Similarly, the Handbook sections covering Standards for Preparation
2 of Agricultural Wage Surveys and Collection of Wage Information, which
3 describes how the SWA makes prevailing wage rate findings do not include these
4 terms or concepts. *Id.* at 105-111 (I-113-I119). Specifically, the sections relating to
5 40 percent rule, the 51 percent rule, and more than one unit of payment, do not
6 include any reference to an “hourly wage guarantee” or “earnings guarantee.” *Id.* at
7 108-109. These handbook provisions do not require SWAs to consider an hourly
8 wage guarantee in making prevailing wage rate findings. *Id.*

9
10 79. The only reference in the ETA Handbook No. 385 related to an
11 “earnings guarantee” is found in the section which provides instructions to the
12 SWA for the completion of the Domestic Agricultural In-Season Wage Report,
13 ETA 232. *See id.* at 124-28 (I-135-143).

14
15 80. That section states: “Rates with earnings guarantee represent a
16 different method of payment from piece rates without earning guarantees and
17 should be listed separately.” *Id.* at 126 (I-141).

18
19 81. The term “earnings guarantee” is not defined in this section and not
20 included in the special instructions. *Id.* at 124.

21 82. The reference is understood to be a term of art referring to historical
22 protections afforded Puerto Rican farmworkers under Public Law 87 which
23

1 entitled them to a *higher* hourly wage than other domestic farmworkers. *See* Bueno
2 Decl., Ex. 3 at 134 & 170-225.

3 83. USDOL Employment Training Administration (ETA) is responsible
4 for reviewing SWA wage rate findings. *Id.* at 110.

5 84. Once the prevailing wage results are finalized, USDOL-ETA
6 publishes the wage results on its Agricultural Online Wage Library (AOWL). *See*
7 <https://www.foreignlaborcert.doleta.gov/aowl.cfm>.
8

9 85. The USDOL-ETA has not published any prevailing wage rates for
10 Washington State since July 23, 2019. *Id.*

11 86. In July 2019, USDOL issued a notice of proposed rulemaking
12 (NPRM) containing numerous changes to its regulations governing the H-2A
13 program. 84 Fed. Reg. 36168 (Jul. 26, 2019).
14

15 87. In the NPRM, USDOL proposed to modernize the methodology used
16 to establish the prevailing wage rate. 84 Fed. Reg. 36168, 36171 & 36184. The
17 proposed changes are significant and include changes to the Handbook 385 and the
18 Form ETA-232 used by SWAs to report prevailing wage survey results. *See*
19 84 Fed. Reg 36168, 36184-88.
20

21 88. The NPRM does not address or reference an “hourly wage guarantee”
22 or the “earnings guarantee” in the sections dealing with proposed changes to the
23 prevailing wage rate methodology.

1 89. USDOL received over 83,000 public comments in response to the
2 July 26, 2019 NPRM. 85 Fed. Reg. 70445. USDOL published a final rule on the
3 methodology by which it determines the AEWR (the minimum hourly wage for H-
4 2A jobs) effective December 21, 2020, and it intends to address all of the
5 remaining proposals from the July 2019 NPRM, including changes to the
6 methodology for prevailing wage rates, in a subsequent second final rule. *Id.*.

8 90. The November 5, 2020, final rule freezes AEWRs at the 2020 level
9 for two-years. *Id.* at 70467. USDOL estimates the impact of this change will result
10 in an average annual transfer from workers to employers of more than \$167
11 million, or \$1.68 **billion** over the next decade. *Id.* at 70447. USDOL further
12 acknowledges that in recent years, farmworker wages have increased significantly
13 faster than inflation or wage increases in the overall U.S. economy. *Id.* at 70452.¹¹

15 91. Each year USDOL issues Training and Employment Guidance Letters
16 (TEGL) which provide guidance to SWAs to conduct agricultural prevailing wage
17

19 ¹¹ At least one lawsuit challenging this AEWR freeze has been filed. *See*
20 *UFW v. Scalia*, Case No. 1:20-cv-01690-DAD-JLT (E.D. Cal.) (Nov. 30, 2020)
21 (plaintiffs' motion for preliminary injunction was set for hearing on December 14,
22 2020).
23

1 surveys. *See* Training and Employment Guidance Letter No. 14-19 (Apr. 13, 2020)
2 available at https://wdr.doleta.gov/directives/attach/TEGL/TEGL_14-19.pdf.

3 92. USDOL did not provide any guidance in the 2019 or 2020 TEGs,
4 governing the Washington State prevailing wage survey conducted in 2019
5 through 2020 regarding the “hourly wage guarantee” or “earnings guarantee.”
6

7 93. Pursuant to the applicable TEGs, ESD submitted annual plans to
8 USDOL-ETA regarding the manner in which it intended to conduct the 2019
9 agricultural prevailing wage survey. *See* Bueno Decl., Ex. 1.

10 94. The annual plans require states to agree that they will carry out all
11 activities, including conducting the prevailing wage survey, to support USDOL’s
12 review and processing of H-2A job orders and applications consistent with the
13 statutory and regulatory mandate that the employment of H-2A foreign workers not
14 adversely affect the wages and working conditions of similarly employed domestic
15 workers. *See id.* at 13, 20-21, 24, 60, 73, & 91.
16

17 95. The annual plans also require states to contractually agree to submit
18 all prevailing wage survey findings in accordance with instructions contained in
19 the TEG. *See id.* at 24, 26, 86, & 88.
20

21 96. There are no instructions in the annual plans submitted by ESD in
22 connection with the 2019 wage survey or in the TEG related to the “hourly wage
23 guarantee” or the “earnings guarantee.” *See* Bueno Decl., Ex. 1.

1 97. The arbitrariness of injecting the hourly wage guarantee concept into
2 the prevailing wage determinations is well illustrated in the 2019 ETA-232 data for
3 yellow cherry harvesting. *See* Pashkowski Decl. ¶ 21, Ex. 8.

4 98. By segregating employer responses based on whether the employer
5 reported an hourly wage guarantee, piece rate responses were eliminated, and the
6 prevailing wage was determined to be \$12 per hour - **\$18 less than what Plaintiff**
7 **Torres normally earns on piece-rate wages during the cherry harvest.** *Id.*,
8 Ex. 8 at 127.

9 99. Had the employer responses reporting a piece rate—with or without
10 an hourly wage guarantee—been treated as the same, the piece rate would have
11 been overwhelmingly¹² the most common method of payment and therefore the
12 prevailing wage would have been a piece-rate wage. *See id.* ¶ 22. Had the
13 prevailing wage been set based on that piece-rate data, some yellow cherry
14 harvesting wages would have increased by \$0.05 per pound. *Id.* ¶ 24; Bueno Decl.,
15
16
17

18 ¹² Nearly 80% of the employers participating in the survey for yellow cherry
19 harvest wages reported paying piece-rate wages. Pashkowski Decl. ¶ 22. The
20 prevailing nature of piece-rate pay for harvest activities was further reinforced by
21 the recently released 2019 Worker Survey results, in which workers overwhelming
22 reported piece-rate wages. Bueno Decl., Ex. 32 at 682.

1 Ex. 14 at 309 (2018 wage survey set harvesting of low-density yellow cherries at
2 \$0.25 per pound).

3 100. The arbitrariness of treating these responses differently is further
4 underscored by the fact that, in the data set provided for yellow cherry harvesting,
5 96% of the employers indicating they had an hourly guarantee reported that rate
6 was at or *below* statutorily required minimums. Pashkowski Decl. ¶ 23. Similarly,
7 in the ETA-232 data provided for red cherry harvest (no variety specified), 96% of
8 the employers indicating they had an hourly guarantee reported that rate was at or
9 below statutorily required minimums. *Id.* ¶ 20.
10

11 101. There is no basis to distinguish between a piece-rate wage with an
12 hourly guarantee that provides no more than statutorily required minimum wages,
13 the state minimum wage and the AEWR (for H-2A employers) from those without
14 an hourly wage guarantee because every grower must comply with statutory
15 minimum wages.
16

17 102. Moreover, because USDOL and ESD fail to define “hourly wage
18 guarantee” or “earnings guarantee,” employers were not informed whether
19 statutory minimums were in fact “hourly wage guarantees” or whether only hourly
20 guarantees that *exceed* these minimums constituted an hourly wage guarantee. *See*
21 *Bueno Decl.*, Ex. 3 at 132; Ex. 4 at 231-32.
22
23

1 103. Because “hourly wage guarantees” are not in common usage in the
2 cherry harvest in Washington State, had employers been clearly instructed that
3 only those guarantees that exceeded statutory minimums should have been
4 reported, it is likely that very few would have reported an “hourly wage
5 guarantee.” *See supra* n. 7.
6

7 104. On December 10, 2020, ESD informed stakeholders that it intends to
8 continue to include the hourly guarantee concept in the survey methodology for
9 the 2020 wage survey and that process is now underway. *See* Bueno Decl., Ex. 33
10 at 690.¹³
11

12 **D. The USDOL-Sanctioned Hourly Guarantee Concept Irreparably**
13 **Harms Washington Farmworkers.**

14 105. As in past controversies related to the prevailing wage rate findings,
15 following concerns being raised by advocates, a stalemate has now resulted, with
16 no corrections made to the 2019 wage survey (thus no current prevailing wages
17 published) and employers defaulting to using wages from the 2018 Wage Survey
18

19 ¹³ The 2020 survey instrument perplexingly adds a question for employers
20 reporting an hourly guarantee that is less than the state minimum wage. *Id.* The
21 only way an hourly guarantee makes sense is if it provides a wage rate that exceeds
22 statutorily required minimums. *See id.*, Ex. 5 at 231; *see also supra* ¶¶ 53 & 82.
23

1 in their H-2A Clearance Orders (effectively H-2A contracts) for 2021. *See supra*
2 ¶¶ 57-60.

3 106. Many of the Clearance Orders filed for 2021 to date have language
4 that reserves the employers' right to lower wages based on rates published on the
5 AOWL and many include apple, pear and cherry harvest wages that would be
6 reduced when prevailing wages based on the 2019 Wage Survey are published on
7 the AOWL. *See* Bueno Decl., Exs. 15, 17, 19, & 20.
8

9 107. National data sources document a trend of farmworker wage increases
10 averaging approximately 5% per year in Washington State and nationally, with the
11 Pacific Region (Oregon and Washington) slightly higher at an average of 6% per
12 year. Declaration of Rachael Pashkowski at ¶¶ 5-7, 9-10, & 13; Bueno Decl., Ex.
13 21 (agricultural labor economist documents trend of farmworker wage increases
14 that exceed the Employment Cost Index (ECI)).
15

16 108. This Court recognized the national trend of increases in farmworker
17 wages in another prevailing wage challenge. *Evans Fruit Co., Inc. v. United States*
18 *Dep't of Labor*, 1:19-CV-03202-SMJ, 2019 WL 7820432, at *5 (E.D. Wash. Oct.
19 11, 2019) (citing statistical data from the U.S. Department of Agriculture).
20

21 109. ESD's prevailing wage surveys also show a general increase in piece
22 rate wages over time. Pashkowski Decl. ¶ 12.
23

1 110. Similarly, the Adverse Effect Wage Rate (AEWR) set by the USDOL
2 has historically increased on average over 5% per year, with a 2020 increase of
3 5.3%. Pashkowski Decl. ¶ 11; *see supra* ¶ 90 & *infra* ¶ 116 (background related to
4 USDOL freezing the AEWR for two years and related issues).

5
6 111. The flaws in the survey methodology, which have resulted in no
7 prevailing wage findings for 2019 and have left employers using 2018 wage survey
8 information while reserving the right to decrease wages in the future, discourages
9 Washington farmworkers like Plaintiff Torres from applying for those jobs and
10 depresses the labor market. Torres Decl. ¶ 14; FUJ Decl. ¶ 16.

11
12 112. Moreover, if the 2019 Wage Survey Results are not corrected and are
13 published as submitted by ESD on the AOWL, certain piece-rate wages will be
14 eliminated. *See supra* at ¶¶ 60 & 65-68.

15 113. The elimination of piece rates in the cherry harvest and reduction to
16 the Washington State minimum wage would result in an approximate 30%
17 reduction in hourly wages based on both industry and worker provided data. *See*
18 Pashkowski Decl. ¶¶ 14 & 16; Bueno Decl., Ex. 3 at 142 (UFW reports the same
19 approximate piece-rate earnings as those analyzed in Pashkowski declaration ¶ 14).

20
21 114. If paid at the Washington State minimum wage instead of a prevailing
22 piece rate, **Plaintiff Torres would lose over \$3,400 (17%) of his annual**
23 **earnings.** *See* Torres Decl. ¶ 8; Pashkowski Decl. ¶ 15.

1 115. Moreover, if the 2019 Wage Survey Results that eliminate piece rates
2 are left to stand, employers will be even more likely to seek H-2A workers at new,
3 much lower harvest wage rates. This will result in even more workers being paid
4 below true prevailing-wage rates and will drive down the wages paid to all
5 farmworkers, contrary to USDOL's statutory and regulatory framework. *See Zirkle*
6 *Fruit Co. v. United States Dep't of Labor*, 1:19-CV-03180-SMJ, 2019 WL
7 7819653, at *2 (E.D. Wash. Nov. 7, 2019) (recognizing that lower prevailing wage
8 rates would depress the wages of Washington workers as the basis for permitting
9 ESD intervention in employer challenges to prevailing wage surveys); *supra*
10 ¶¶ 33-35 & 41-47.

11
12 116. Because most farmworkers live at or below the poverty line, a
13 reduction in wages, even of 5%, can mean the difference between keeping a family
14 housed or becoming homeless, feeding a family or going hungry, and risking
15 illness or paying for medicine, harm that cannot be undone through the payment of
16 back wages. *See* FUJ Decl. ¶¶ 7, 16-17; Torres Decl. ¶¶ 2 & 14-15; Bueno Decl.,
17 Ex. 30 at 562; *see also United Farm Workers v. Perdue*, No. 1:20-cv-01452-DAD-
18 JLT, 2020 WL 6318432, at *14 (E.D. Cal. Oct. 28, 2020) (finding failure to
19 conduct wage survey that was likely to result in 5 percent wage cut for
20 farmworkers constituted irreparable harm in the form of economic hardship).
21
22
23

VI. CAUSES OF ACTION

FIRST CLAIM FOR RELIEF

(Administrative Procedures Act – Without Observance of Procedure
Required by Law – 5 U.S.C. § 706(2)(D))

117. The APA provides that courts must “hold unlawful and set aside agency action” that is “without observance of procedure required by law.” 5 U.S.C. § 706(2)(D).

118. The APA requires agencies to publish notice of all proposed rulemaking in a manner that “give[s] interested persons an opportunity to participate in the rule making through submission of written data, views, or arguments” 5 U.S.C. § 553(c).

119. USDOL never published notice of the change in its prevailing wage methodology, which interjects the guaranteed wage concept into the wage finding process, including in its July 26, 2019 NPRM, thereby denying Plaintiffs and other affected parties an opportunity to present comment and evidence, in violation of 5 U.S.C. § 706(2)(D).

120. USDOL’s prevailing wage methodology change was not an “interpretative rule[], general statement[] of policy, or rule[] of agency organization, procedure, or practice.” 5 U.S.C. § 553(b). To the contrary, it was a substantive rule change that fundamentally altered Plaintiffs’ rights and employers’ obligations under federal law.

1 121. Defendants' violations cause ongoing harm to Plaintiffs.

2 **SECOND CLAIM FOR RELIEF**

3 (Administrative Procedure Act – Arbitrary and Capricious –
4 5 U.S.C § 706(2)(A))

5 122. Under the APA, a court must set “aside agency action” that is
6 “arbitrary and capricious.” 5 U.S.C. § 706(2)(A).

7 123. Under the INA, in its administration of the H-2A program, the
8 USDOL has a statutory duty to prevent adverse effects to the wages of U.S.
9 workers.

10 124. USDOL acknowledges that prevailing wage surveys are most useful
11 to protect the wages of U.S. workers where employers commonly pay based on a
12 piece rate and when State agencies know based on past experience that prevailing
13 wages are higher than the AEWR. *See* 84 Fed. Reg. 36168, 36180 (Jul. 26, 2019).

14 125. The change in USDOL’s the prevailing wage methodology, which
15 interjects the guaranteed wage concept into the wage finding process, violates
16 USDOL’s statutory obligation to protect the wages of U.S. farmworkers against
17 adverse effects from the employment of H-2A foreign workers.
18

19 126. USDOL has failed to explain its departure from its longstanding
20 policy which does not provide for the use of the “hourly wage guarantee” in
21 making prevailing wage findings. *See* Bueno Decl., Ex. 2 at 108-09 (Handbook
22
23

1 No. 385 does not include the hourly wage guarantee concept in the prevailing wage
2 rate finding instructions).

3 127. USDOL's change in policy and practice is also irrational because it
4 interjects the hourly wage guarantee concept, which is already guaranteed by law
5 (e.g. state minimum wage or the federal AEWR), into the wage finding process
6 without defining what the SWA or employers are being asked to report on or
7 include, and results in higher piece-rate wages being eliminated when piece rates
8 are, in fact, the prevailing wage in the industry.
9

10 128. Finally, the change in policy and practice is arbitrary and capricious
11 because it fails to consider an important aspect of the problem; the protection of
12 U.S. farmworkers is the central purpose of setting prevailing wages and despite the
13 widely accepted understanding that Washington farmworkers earn more than
14 minimum wages when working by the piece rate, the policy and practice results in
15 the elimination of these higher wages.
16

17 129. USDOL's policy and practice is therefore "arbitrary and capricious"
18 and in violation of the APA. 5 U.S.C. § 706(2)(A).
19

20 130. Defendants' violation causes ongoing harm to Plaintiffs.

21 **VII. REQUEST FOR RELIEF**

22 Plaintiffs ask this Court to grant them the following relief:

23 1. Declare that Defendants failed to observe the procedure required by

1 law when changing the prevailing wage methodology to interject the hourly wage
2 guarantee concept into the wage finding process, in violation of
3 5 U.S.C. § 706(2)(D);

4 2. In the alternative, declare that the change in prevailing wage
5 methodology which interjects the guaranteed hourly wage concept into the wage
6 finding process is arbitrary, capricious, an abuse of discretion, or otherwise not in
7 accordance with law within the meaning of 5 U.S.C. § 706(2)(A);

8 3. Enjoin the Defendants from interjecting the hourly wage guarantee
9 concept into the wage finding process, prohibiting its use for the 2020 Wage
10 Survey, and to instruct ESD accordingly;

11 4. Enjoin the Defendants and all its officers, employees, and agents, and
12 anyone acting in concert with them, from accepting, certifying and posting in the
13 electronic job registry any H-2A job order, including authorizing access to the
14 interstate clearance system without requiring the employer to include a five percent
15 wage increase for all piece-rate activities pursuant to 20 C.F.R §§ 655.100,
16 655.120, 655.143, 655.144, 655.150 and 655.161, until a prevailing wage survey
17 that complies with federal law is completed in Washington State;

18 4. Enjoin the Defendants from permitting the H-2A system to adversely
19 affect the wages of Washington farmworkers and order Defendants to preserve the
20 status quo and rights of U.S. workers by providing notice to all H-2A employers in
21
22
23

1 Washington State, pursuant to 20 C.F.R. § 655.120(b), that each employer must
2 immediately pay all workers employed under H-2A job orders a five percent wage
3 increase for all piece-rate activities and continue to pay that increase until a
4 prevailing wage survey that complies with federal law has been completed in
5 Washington State;
6

7 5. In the alternative, order Defendants to preserve the status quo and
8 rights of U.S. workers by providing notice to all employers in Washington State
9 using H-2A contracts that have been certified or will be certified for work to be
10 performed in 2021 that piece-rate wages may increase pending the outcome of this
11 litigation;
12

13 6. Award Plaintiffs their reasonable fees, costs and expenses, including
14 attorneys' fees, pursuant to the Equal Access to Justice Act (EAJA),
15 28 U.S.C. § 2412;
16

17 7. Grant other further relief as just and appropriate.
